7. GLOSSARY

2. Purpose

The purpose of this document is to describe the business processes and functionalities of Tatmeen, Ministry of Health and Prevention (MoHAP) Track and Trace system.

The document details the solution and various control that are adopted for the processes.

3. Introduction

This document provides a high-level, as well as detailed description of the business process and flows of the Tatmeen system.

4. Tutorial Dispensing

Pharmacies, hospitals and clinics, among others, where drugs are dispensed, are required to capture an exit event - dispensing.

The dispensing process starts with providing a list of the item(s) intended to be dispensed within Tatmeen.

The data from the serialized item(s) (SGTINs or/and SSCC) is sent to Tatmeen where a verification process is undertaken to determine the product authenticity and the current status of the to-be dispensed SGTINs.

The state of the serialised products, in order to be successfully dispensed, can only be "Commissioned" and "Import Cleared". Products that are decommissioned for any reason, for instance, expired products, etc. won't be allowed to be dispensed.

Once serialized product or bulk of the serialized product is successfully verified (authentic and valid to be dispensed), serialized item(s) are reported as "Dispensed".

4.1 Dispensing

When pharmacies, hospitals, clinics, etc. are dispensing items, the status of these items should be active and these items must be import cleared. After the items are dispensensed the status will change to Dispensed (decommissioned).

Select Product Status Update in the navigation menu in the Portal or Mobile to access Dispensing status change.

Figure 4 Dispensing - Add items

Items that are being Dispensed can be:

- SSCC or
- SGTIN

Items can be added manually by entering values or by scanning with a scanner. To continue to the next page at least one SSCC or SGTIN item must be added.

If you press Clock a new page opens for the Historical view where all status changes to dispensed are displayed [4.1.1.4].

4.1.1.1.1 Adding items with scanning

When the first page opens and once the focus is on the application, the application is ready to scan the barcode with a scanner, and a scanned item will be added.

Figure 5 Dispensing - Scan item

If the application doesn't have focus, scanning is not possible. First, add the focus to the application so scanning will be possible.

Figure 6 Dispensing - Missing focus

4.1.1.1.2 Adding SSCC manually

Item can be added also manually. For manual data entry press Enter manually Enter manually where a new page opens.

5. HOW – TO Dispensing

5.1 How do I change the status of one or more items to Dispensed?

In the navigation menu select Product Status Update \rightarrow Dispensing.

Manually enter or scan one or more items where status needs to be changed [4.1.1.1]. Confirm status change [4.1.1.2].

6. FAQ – Dispensing

6.1 Can I dispense an item without Product Clearance procedures (Import Clearance, Custom Release or/and Market Release)?

No. Dispennsing is possible only after a product has completed the the Import clearance process.

6.2 Can I dispense a pallet or shipper case or just secondary pack (saleable unit)

In addition to secondary packs (saleable units), Tatmeen also allows bundles, shipper cases, and pallets (logistics units) to be dispensed. In this case, the dispensation operation will be applied to all the saleable units contained within.

6.3 How can I dispense an expired product

Expired product cannot be dispensed in any case, and it will be marked as decommissioned by Tatmeen. In this case, please follow your organisation operation procedures to handle expired product further.

6.4 The product has been blocked by the government inspector, can I dispense it? If not, what needs to be done

Blocked product cannot be dispensed until it is unblocked again by an inspector. In this case, please follow your organisation operation procedures to handle blocked product further.

6.5 I made a mistake and dispensed a product, can I reverse my action and perform returns

The Dispensation operation is not reversible. Once a product is marked as dispensed, it cannot be used anymore within Tatmeen. If you have dispensed a product by error, please follow your organisation procedures to handle this product further.

7. GLOSSARY

General short terms and abbreviations can be found in the global Glossary (see section 1.7 of this document). A list of additional terms that were referred to in this document have also been added here:

Acronym	Term	Definition
API	Application Programming Interface	API Management is a solution included in the SAP BTP that provides the means to integrate SC (participants) via a B2B connection.
ATTP	Advanced Track and Trace for Pharmaceuticals from SAP	The SAP solution supports track and trace activities designed for Pharmaceutical purposes but also supports other industries.
EPCIS	Electronic Product Code Information Services	EPC information services (EPCIS) is an EPC global standard designed to enable EPC-related data sharing within and across enterprises. This data sharing is aimed at enabling participants in the EPC global Network to obtain a common view of the disposition of EPC-bearing objects within a business context.
GCP	Global Company Prefix	Global Company Prefix
GLN	Global Location Number	Global Location Number
GS1	Global Standards One	GS1 (<u>https://www.gs1.org/</u> and <u>https://www.gs1ae.org/</u>) is a global organization dedicated to the design and implementation of global standards and solutions to improve the efficiency and visibility of supply and demand chains globally and across sectors. The GS1 system of standards is the most widely used supply chain standards system in the world.
GTIN	Global Trade Item Number	The identifier for trade items developed by GS1. Such identifiers are used to look up product information in the database (often inputting the number through a bar code scanner), which may belong to a retailer, manufacturer, collector, researcher, or other entity.
KG	Kilogram	Kilogram
MAH	Marketing Authorization Holder	An organization that is the brand-owner of a particular product.
MoHAP	Ministry of Health and Prevention of the UAE	UAE ministry is responsible for regulation, healthcare delivery, and oversight.
N/A	Not Applicable	This shall be used where no relevant information can be added.
SC	Supply Chain	The service to support logistics operations relating to the sourcing and transportation of goods. The broader application can also support services.
sGTIN	Serialized Global Trade Item Number	Serialized Global Trade Item Number
SHP	Shipment Import Permit	Shipment Import Permit
SME	Subject Matter Expert	Subject Matter Expert

Document ID: Tatmeen	TRM-0251	Tatmeen	Training	Manual	for Dispensing	v2.0
200000000000000000000000000000000000000						

Acronym	Term	Definition
SSCC	Serial Shipping Container Code	A GS1 identification key is used to identify a logistic unit. This unique identifier is comprised of an Extension Digit, a GS1 Company Prefix, a Serial Reference, and a Check Digit.
System	Tatmeen	Tatmeen
Tatmeen	Name of the United Arab Emirates Track & Trace (T&T) System	Name of the Track & Trace (T&T) System
T&T	Track and Trace An electronic solution to support the recording of the h movement of goods based on the unique identification of y Subsequent evaluation of the electronic records supports rep of movements and their traceability.	
UAE	United Arab Emirates	United Arab Emirates
UoM	Unit of Measure	Unit of Measure
URL	Uniform Resource Locator	The mechanism used by browsers to retrieve any published resource on the web.
WHO	World Health Organization	World Health Organization
WHO ATC Codes	World Health Organization Anatomical Therapeutic Chemical code	A unique code is assigned to medicine according to the organ or system it works on and how it works.
WMS	Warehouse Management System	Warehouse Management System
3PL	Third-Party Logistics	External (to the MoHAP organization) supply chain partners.
